JOURNAL OF RESEARCH IN SCIENCE TEACHING

Volume 2, 1964

ISSUE 1, MARCH

From the Editor 1
Comment and Criticism
Perception of Children: Alan H. McGowan 2
Statement of Purposes and Objectives of Science Education in School: Foreword by Paul B. Sears; Statement by William Kessen 3
Science Concept Achievement and Cognitive Functions: Norval C. Scott, Jr. 7
Remedial Research: Approaches and Models for Research in Education: David I. Mostofsky 17
The Potential Scientist Pool: William W. Cooley 24
Circles, Pendulums, and Progress in Science Education: R. Will Burnett 33
A Technique for Grade Placement in Elementary Science: William Harris 43
Organic Chemistry Tests—An Analysis: Will S. DeLoach 51
Short Reports
The Prediction of Success Using Programed Science Materials: Alton L. Taylor 58
Evaluating the Effectiveness of a Linear Programed Course in Science Education: J. V. Toohey 59
The Interaction of Experiments and Ideas: A BSCS-Second Course: Norman Abraham 60
Problem Solving Behavior of Teachers as a Function of Conceptual Structure: Joan E. Sieber 64
The Traveling Science Teacher Demonstration Program and In-Service Education: Gerald K. Bogen 69
Book Review
New Curricula, Edited by Robert W. Heath. Reviewed by Robert Lepper 73

ISSUE 2, JUNE

From the Editor 75
Comment and Criticism
Grade Placement—Need for a Shift in Emphasis: Peter B. Shoresman 77
The Role of Inquiry in Science Teaching: F. James Rutherford 80
An Analysis of the New York State Regional Program in Physical Science for Elementary School Teachers: Gene W. Moser 85

The Dawn of the Scientific Epistemology: 1564–1964: Donald C. Orlich 95
Federal Assistance to Science Education in Indiana: Leo W. Marshall 100
Short Reports
Comparison of Manifest Needs of Open and Closed Minds: C. Gratton Kemp 107
Conservation Attitudes of Science Majors as Compared with Those of Non-Science Majors: Kenneth H. Hoover and Richard E. Schutz 108
Reflections Upon Bruner's Hypothesis: Gary R. Smith 111
The Evaluation of Problem Solving in Science: David P. Butts 116
A Comparative Study of Selected Needs, Values, and Motives of Science and Non-Science Teachers: Joseph C. Bledsoe and Kenneth T. Morris 123
Symmetry: The Case History of a Program: E. Haughton and A. L. Loeb 132
The Madison Project's Approach to a Theory of Instruction: Robert B. Davis 146
Book Review
Democracy and Excellence in American Secondary Education, Harry S. Broudy, B. Othaniel Smith, and Joe R. Burnett. Reviewed by Sidney Rosen 163
Books and Pamphlets Received 164

ISSUE 3, SEPTEMBER

From the Editor 165
PIAGET REDISCOVERED: SELECTED PAPERS FROM A REPORT OF THE CONFERENCE ON COGNITIVE STUDIES AND CURRICULUM DEVELOPMENT, MARCH 1964
Preface 168
From the Beginning . . . : V. N. Rockcastle 170
Piaget Rediscovered: Eleanor Duckworth 172
Part I. Cognitive Development in Children: Piaget Development and Learning: Jean Piaget 176
Part II. Cognitive Development in Children: Selected Psychological Reports
American Cognitive Studies: A Review: Richard E. Ripple . . . 187
Experience and Cognitive Structure: Oscar G. Mink 196
Learning Research and Curriculum Development: Lee J. Cronbach 204
Implications of Piaget's Talks for Curriculum: Jonas Langer . . . 208
Development and Assessment of Cognitive Structures: William R. Charlesworth 214
Internal Necessity and Contradiction in Children's Thinking: Jan Smedslund 220
Cognitive Development and the Learning of Elementary Concepts: Joachim F. Wohlwill 222

Learning and Thinking in the School Situation: E. A. Peel..... 227
The Illinois Studies in Inquiry Training: J. Richard Suchman.. 230
Comments on the INRC Group: J. A. Easley, Jr..... 233
Part III. Curriculum Project Reports
The Science Curriculum Improvement Study–Report to the Piaget Conference: Robert Karplus..... 236
The Elementary Science Study Branch of Educational Services Incorporated: Eleanor Duckworth..... 241
Additional Comments: Benjamin Nichols..... 243
Concepts in Biology: Herbert L. Mason..... 244
Cognitive Theory and the SMSG Program: Jeremy Kilpatrick 247
Looking Back at the Conference. Verne N. Rockcastle..... 252
A Scale of Mental Development Based on the Theory of Piaget: Description of a Project: Adrien Pinard and Monique Laurendeau 253
The Transition from Concrete to Abstract Cognitive Functioning: Theoretical Issues and Implications for Education: David P. Ausubel..... 261
Book Review
The Developmental Psychology of Jean Piaget, John H. Flavell. Reviewed by James J. Gallagher..... 267

ISSUE 4, DECEMBER

From the Editor..... 269
The Process Approach of the AAAS Commission on Science Education: Arthur H. Livermore..... 271
A Synthesis of the New Curricula in Physics and Chemistry for the Secondary School: Vernon H. Cheldelin and Michael Fiasca..... 283
Elementary Science Study—Two Years Later: Benjamin Nichols. 288
The Science Curriculum Improvement Study: Robert Karplus.... 293
Research in the Learning of Mathematics at the University of Maryland: John R. Mayor..... 304
Goals for School Mathematics: The Madison Project View: Robert B. Davis..... 309
Current Activities of UICSM: Steven Szabo..... 316
A Science Program for the Elementary Grades: John K. Wood..... 323
University of Illinois Elementary-School Project—1964: J. Myron Atkin..... 328
The Earth Science Curriculum Project—A Report of Progress: Robert L. Heller..... 330
The Boston College Mathematics Institute Program: Margaret J. Kenney..... 335
Quantitative Physical Science for the Ninth Grade: Sherwood Githens, Jr..... 345
Elementary School Science by a Quantitative Approach: Clifford Swartz..... 349
Science Teacher's Adaptable Curriculum: John S. Hutchinson..... 356
UCESSP: An Experiment in Diversity: Lloyd Scott..... 364
